SEPTEMBER 1984 GENERAL MEETING
(Minutes taken by WB3KOJ)

The 418th General Meeting, held on September 10th, was opened at 8:20 P.M. (Ed hocked his watch) by KB3IV. Ed made several announcements and gave the upcoming hamfest schedule. -WB3KOJ, again subbing for the again absent (minded), secretary, read the minutes of the Aug. General Meeting, which were approved. - W3IIN gave the Treasurer's Report (while BBB moaned) - The meeting was attended by 36 members and 11 guests. W3VVS introduced: Al (W3JWF) & Edna Gaskill; Mark Akerman, WA3AUN; Howard Ziserman, WA3GOV; Larry Bock, son of K3PHC; Rich Miskinis, N3AGS; Tom Hogarty, N3DGG; Veniese Pommer, XYZ of W3UZ; Ahmad Pelzer; John Galanti and Ed Quinn, K2SIS. - Ed mentioned that AK2I must undergo surgery and that volunteers are needed to handle the Thursday night net for the next several months.

(Good luck & best wishes Jake) - W3BBB told the club that plans are being made to add a final amplifier to the repeater. Bill, W3GQD, has agreed to design and build the amp. (No ADI, it's not a Kw.) Jim said that several new goodies have been added to the repeater and that shortly all members will be able to access the time, date and brag tape. In addition, by encoding 911, a user will be able to open the receivers of six control stations, who will aid the caller. Jim also said that the Station Master antenna will be reinstalled. - W3PWG, stated that the Telrex antenna has finally been installed at W3TKQ. He also said that from November to March the station will have limited air time, while the demonstration area is being refurbished. - W3IIM indicated that the invitations for the Banquet will be going out shortly. Jack said that anyone wishing an invitation sent to a person, other than a club member, should contact

IIM or IIN. Jack then introduced Ed Quinn and John Galanti from Bell Mobile. The club was treated to an interesting program on the cellular phone system. - KB3IV adjourned the meeting at 9:40, refreshments were served.

Respectfully Submitted,

Natalie Gordon -WB3KOJ

OLD BUSINESS

TVI RETREAT
30 YEARS AGO
OCT. 1954

W3IM will speak on instrumentation techniques in stress analysis at the October meeting.

He's also going all-out for the club this year for the Almo show. If you want to see what the club is designing you'll have to go to the Almo convention at the Penn Sherwood Hotel and visit our booth. So far only W3NIP has offered to help Jay -- more help needed!

Banquet tickets go on sale at the November meeting at \$3.00 per nose. The date: Nov. 13 at the Casa Conti ... W3SGR has a new 22 foot Sea Skiff with a 110hp motor at his summer home at Beach Haven. We understand that Carl has found a real fishing spot. All he has to do is drop the line over and he has a fish on it! ... W3GIF is due special mention for working on the prize committee for the banquet ... W3PXY is the proud possessor of a state license for Professional Engineers this last month ... W3IGW had W3IW and W3DSG down to Wildwood recently ... We are indebted to W3WNC for such a fine rendition of an auction at the last meeting. We had 70 items from 5 cents to \$40. and Hy got rid of every one.

Excerpted by W3IIM

THE BLURB
15 YEARS AGO
OCT. 1969

Program speaker: Tom Benham W3DD.

W3AWH has joined the firm of Ballard, Spahr, Andrews and Ingersoll, a very prominent group of Philadelphia lawyers.

The club received a letter of congratulations from the Institute for the assistance given to help make their recent "Walk on the Moon" program such a success.

Excerpted by W3IIM

**** UPDATE ****

If you missed the last meeting you missed one of the most interesting programs of the year! ONLY 36 MEMBERS ATTENDED out of a membership of 148! The summer's over folks. Let's start to show some interest and appreciation for the time spent in preparation and presentation by the program speakers.

October 1, General Meeting program: FAMILY NIGHT including a specially arranged Planetarium show including a demonstration of the newly computerized control console, courtesy of Paul Twomey, WB3BOD. Jinny and I recently witnessed a computerized show at the Baltimore Science Center where they have the same type of installation. In one word it was FANTASTIC! We're sure you'll be impressed!

November 5, General Meeting program: OLE TIMER'S NIGHT with RUSS MILLER, K3NYN as guest speaker. No dinner this year, but we guarantee a fun-time for all! (If you're disappointed about the dinner part, plan to come out to the banquet four days later. Please see menu printed elsewhere in this issue.)

November 9, PHIL-MONT'S 35! - Banquet If you haven't received special notice of this event in the mail yet, please contact Jinny, W3IIN at 215-794-7623 immediately. She'll see that you receive your personalized invitation! The alternate prize given at our general meeting drawings is ONE BANQUET TICKET worth 25 bucks. So far, Sharon (XYL-KB3IV) and Jinny have won them. Who will be next? Only two more drawings to go.

December 3, ELECTIONS!!!

Read your Blurb -- There'll be a quiz at the next meeting!

SEEUOUATTHEMEETING!

de W3IIM

And some more dates you should be aware of for Phil-Mont's Calendar-October

- 01 Regular Meeting - regular place - regular time - see above
- 07 W3SRU - 2m NCS
- 08 Columbus Day (There's a B-I-G celebration being planned for 1992!)
- 12 ~~BLWRB~~ Deadline! Ye Ole Editore goes on vacation for four weeks!
- 14 W3AWG - 2m NCS
- 17 Bored of Directors' Meeting at W3GQD
- 21 AK2I - 2m NCS
- 28 K3PHC - 2m NCS
- 05 November N3AVE - 2m NCS

Let's not forget the PackRats HAMARAMA '84 on 06-07 October, conference on Saturday and the Flea Market on Sunday - Bucks County Drive-In, talk-in freq. 146.52 MHz. To ease the parking problem, \$5.00 per carload.

Well, we've had misprints and malprints, and now, we have had a case of typographical errors, well, it was more of no typographical anything, it just didn't get in last month's BLURB. SOooo, if you are keeping score, here's what was missed, with apologies to KOJ, for all the work he puts into this announcement, and to those who should have been announced - - -

"How do you know that Chaucer dictated to a stenographer?"

"Just look at the spelling."

As per strong request by W3IIM, we mailed(yes, I do mean "we") several copies of our BLURB to W2NSD/1. So I give you another chapter in the "Terrible Saga Of No-Code," with but one comment, "Wot did he say?" (de ye ole ED)

Blurb.....

9/8/84

Odd that K3GNM has such a clear crystal ball and is able to see the amateur radio problem so clearly, while poor old Wayne Green suffers terribly from tunnel vision. This far sighted chap is able to see the turning of amateur radio into a CB band as a result of imagined hordes of nerds being turned loose by a no-code license.

Now I don't know what comfortable backwater GNM is in, but I sure know he has not tried to use a repeater in New York or Southern California, where the CB bands are a pleasant oasis by comparison. I have a news flash - the nerds are already here and they already outnumber the jocks in some areas.

One of the more serious side effects of having been active in amateur radio for over 45 years is a memory. May I refresh GNM with a recollection that the first CBER who was convicted and had his license removed for obscene language on CB was also an W3 Extra Class amateur!

Obviously GNM hasn't worked DX, else he would know that some of the best operators in the world are the no-code Japanese - who now outnumber us about four to one, with half our population to work with.

With the CBERs moving into the low end of the 10m band in ever larger numbers, what will amateur radio be like in two or three years?

Oh yes, my objectivity was challenged. I think there are few amateurs who will agree that I've made any effort to say what was popular so I could get subscriptions. To the contrary - I've always said and written what I believed in and thought was best for amateur radio. And, for those of you with some back issues of 73, history is a powerful testament to my being right.

Amateur radio seems to be in its dying days. I hate to see that, but I don't know any answer to the sickness - a large component of which is a blindness to the needs of the hobby and our country by amateurs, as typified by K3GNM. The world changes constantly and the magazine or company which does not change with the world will die - just as amateur radio, a fantastic preservation of the past, is dying.

Oh, by the way GNM, I sold 73 Magazine a year ago and have zero financial or operational interest in it these days, so the subscription numbers are not my problem and have no effect on me one way or the other. You'd better start rewriting your book - the one which questions my altruism. Cheap shot, GNM.

Wayne
73....Dr. Wayne Green W2NSD/1

THE ARRL Letter

Volume 3 Number 19

September 13, 1984

Hams Face Two New Challenges

The FCC has proposed to reallocate half of the 160-meter band (1900-2000 kHz) to non-government radiolocation because of an anticipated expansion of the AM Broadcast Band that would force certain radiolocation stations to move. Although the September 11 release of Docket 84-874 came as a surprise to the Amateur Radio community, ARRL's reaction was swift. ARRL is prepared to file tomorrow (September 14) a motion to hold this NPRM in abeyance pending the resolution of an ARRL petition filed September 10.

Ironically, the day before this NPRM was released, the ARRL filed a Petition for Initiation of Inquiry Procedure on the present use of the medium frequency bands by non-government radiolocation users. The purpose of this inquiry is twofold: first, to define the spectrum requirements of individual users, and second, to find the number of radiolocation stations needed in a given geographical area. The League requests that the Commission take a look at the spectrum efficiency and the technical need for the use of the 1900-2000 kHz band by non-government radiolocation users. As we go to press Thursday morning, we have no indication of the course that the FCC will follow in this case, which is beginning to look like the bureaucratic equivalent of a soap opera. We'll keep you updated via this letter and WIAW bulletins.

¶ ARRL has requested that the FCC issue a Declaratory Ruling of Limited Federal Preemption of State and Local Regulation of Amateur Radio Station Installation and Operation. Such a ruling would delineate the limitations of local zoning and other local and state regulatory authority over Federally-licensed Amateur Radio facilities.

In documenting the need for such a ruling, ARRL cited a number of cases where

local authorities have attempted to use zoning regulations to prohibit effective Amateur Radio operations. Although the local officials tend to couch their actions and decisions in terms of the protection of health and safety, there is little basis in the safety or health concerns.

ARRL goes on to point out that the Commission did issue a Public Notice in 1977 discussing the FCC's jurisdiction and pre-emptive authority over local regulation of radio with respect to interference problems. This notice did not, however, provide a "means by which a municipality might judge whether or not a particular ordinance is, facially or as applied, unduly restrictive or should be pre-empted."

ARRL says that its request is straight forward and need not require FCC participation or intervention in local disputes or litigation. But without such a declaratory ruling, the present trend toward municipal and judicial intervention will continue. This will have a detrimental impact on the future of the Amateur Radio Service.

The League's petition is similar to one filed by United States Communications, Inc. (USCI) seeking a declaratory ruling with respect to TVRO (television receive-only) earth stations installed in residential areas.

The FCC seeks comments on the League's filing. An original and four copies of your comments must be received by the Secretary, Federal Communications Commission, 1919 M Street, NW, Washington, D.C. 20554 on or before November 9. As a courtesy, but not a requirement, please send a copy of your comments to ARRL Hq. Reply comments are due on or before December 14. Comments should refer to document number PRB-1. A copy of the League's request is available from ARRL Hq. for a
(continued on next page)

OCT '84

Page 5

(pre-emption continued)

9 X 12 inch s.a.s.e. with 88¢ postage.

Please think carefully about the kinds of comments that will have a positive impact on this proceeding. You should construct non-emotional, factual accounts of any difficulty you have had in obtaining permission to erect an effective antenna. Of particular importance will be such things as legal and professional expenses incurred, as well as incidental expenses such as time lost from work. Venom will not improve our chances of obtaining this ruling.

According to ARRL Counsel Christopher D. Imlay, N3AKD, several powerful organizations, e.g., the American Planning Association, the National League of Cities, the City of New York, and the National Association of Counties, have filed comments opposing USCI's request. Most criticize the USCI request by stating that there is no factually demonstrated problem with local government regulation. Some of these groups may file similar comments with regard to the League's petition. The battle is far from won, and the stakes are very, very high.

¶ On July 31, the FCC released an order dismissing a petition filed by Dennis M. Dutton, KI4FV, requesting that FCC revisit the no-code-license issue. Dutton claimed that the international regulations gave the FCC "not only the right to make these amendments, but also the responsibility." The Commission, however, did not see it this way. Private Radio Bureau Chief Robert S. Foosner noted in the order that Dutton had presented no new facts or issues to warrant further consideration.

DID YOU KNOW??????

According to the new FCC Rule Book published by the ARRL:

Amateurs are no longer required to identify the station with which they are in contact, PERIOD;

The ONLY exception is INTERNATIONAL third party traffic;

Amateurs are ONLY required to give THEIR call at the END of a contact AND at least once every 10 minutes DURING the course of the QSO.

Old habits are hard to break!

COMPUTERS ANYONE?

Twelve half-hour TV programs about the world of Computer Technology will be broadcast over WHYY TV 12 beginning the week of November 4 on Saturdays and Wednesdays at Noon.

Topics will include:

- Mechanics of Computers
- Computer Programs
- Information Storage
- Communications Between Computers
- Computer Languages
- Computer-Assisted Instruction
- Computer Simulations and Games
- Computer Graphics
- Computer Music
- Computers at Work
- The Future of Computers

W5YI REPORT.

NPRM COMING ON NEW WARC HAM BANDS

Things have been sort of quiet at the FCC of late. The Commissioners have on vacation during the entire month of August. There has not been any agency action at all. The Commissioners are now back and agenda meetings are just now resuming.

I was talking with Ray Kowalski, FCC Chief Special Services this past week trying to scare up some news tidbits. While admitting that amateur radio news "was pretty thin", he did, however, say that the new 902 to 928 MHz (but as yet unallocated) ham band will be part of an amateur radio "package" that will be issued by the Private Radio Bureau on implementation of the new WARC bands.

There were two petitions filed seeking prompt access to the WARC bands at 18 and 24 MHz. The FCC will be dealing with those bands as well as the 902-928 spectrum. "They are all on the same docket... (and will) be a Notice of Proposed Rulemaking which should be issued in September," Kowalski said. "There will be a staff recommendation on the new band variables including ways of setting up the privileges and emissions."

● The ARRL union is out! Employees, both professional and the rank-and-file staff, voted overwhelmingly in a Labor Relations Board election not to consider it further.

Cumberland County

C-CARS

Amateur Radio Service

P.O. BOX 448
NEW KINGSTOWN PA 17072

Dear Fellow Radio Amateur:

Effective September 1, 1984, the Cumberland County Amateur Radio Service (C-CARS) will assume the responsibility for operation of the Third Call Area QSL Bureau. Since this new operation will NOT have access to the records of the previous bureau, it cannot answer questions about previous credits or special arrangements.

This letter provides important information regarding the use of this Bureau. Please read it carefully and follow the instructions set forth below. Your cooperation will be appreciated.

1. This Bureau is for incoming foreign DX cards only. We do not accept any outgoing QSL cards or cards for domestic contacts.
2. Always keep envelopes on file. Unclaimed cards are the Bureau's biggest problem. See item 7 below.
 - a. Send clasp-fastening, end-opening envelopes, approximately 5x7 $\frac{1}{2}$ inches in size. (Up to 5 are permitted.)
 - b. DO NOT SEND letter-size or legal-size envelopes (they get lost in the filing boxes). Similarly, jumbo-size or padded envelopes are not acceptable.
 - c. NOTE: The U.S. Postal Service imposes a 9¢ surcharge for all envelopes 6 1/8 x 11 $\frac{1}{2}$ inches or larger which weigh one ounce or less. That's 9¢ in addition to the basic postage unit.
 - d. Please DO NOT send used envelopes to the Bureau. The Post Office frequently returns them.
 - e. Keep separate envelopes on file for each call sign for at least one year after changing calls.
 - f. PRINT your call sign CLEARLY in the upper left-hand corner of each envelope. DO NOT put on a return address. Put your COMPLETE name and address on each as the addressee.
3. Postage... Place one unit of postage on each envelope, sufficient to mail at least one ounce. You may affix additional stamps to the envelopes depending on your level of activity. You may also want to clip extra stamps to cover postal increases.
 - a. If you are a "big DXer" or a QSL manager, you are expected to keep sufficient postage and envelopes on file with the Bureau to clear your file at least monthly.
 - b. WE DO NOT SELL STAMPS OR ENVELOPES!!! Please DO NOT send checks or money for either. PLEASE NOTE THIS CHANGE, The new Bureau will use ONLY your self addresses, stamped envelopes for the foreseeable future.
 - c. We WILL be happy to accept small personal donations to assist in operating the Bureau and accomplishing the necessary transition.
4. When "LAST ENVELOPE" appears on your envelope, that means there are no more envelopes on file at the Bureau. Please send more S.A.S.E. envelopes promptly.

5. DO NOT expect special services such as "mail monthly regardless of number of cards," or "No SWLs," or sequentially numbered envelopes sent in order, etc.
6. BE PATIENT!!!! Many foreign QSL Bureaus only forward cards via surface mail once per year. The Process of sorting the cards and routing them to your envelopes may take several weeks. DO NOT expect cards in less than 6 to 8 months; in fact, many will be for contacts a year or more old. The transfer of cards and envelopes from the former Bureau is expected to be accomplished in a timely manner.
7. IF YOU DO NOT WISH TO RECEIVE YOUR CARDS, PLEASE LET US KNOW IN WRITING AND WE WILL ROUTE THEM TO THE "CIRCULAR FILE". FOR YOUR CONVENIENCE, WE HAVE INCLUDED A SIMPLE FORM WHICH YOU MAY RETURN.
8. This Bureau is staffed and operated by conscientious hams, XYLS and others who volunteer their time for you. They remain anonymous and only ask for your cooperation with the above to keep the system flowing as smoothly as possible and in the best interest of the Amateur Radio service.
9. Other expenses incurred to forward your cards are funded as one of the A.R.R.L. Membership Services. Most amateur radio societies in other countries process QSLs only for members. Please support your League so we can continue serving you.
10. Finally, if you desire more information or have any questions about service to you, feel free to write the Bureau Manager in duplicate leaving space to write in the answers to your questions. This will minimize his paper work. Please enclose an SASE and always include your call sign, We will make every effort to provide a timely response.

73 and good DX,

Third Call Area QSL Bureau Manager
